

# Looking Forward:

What is next in the world of EDCs?

Laura N Vandenberg

University of Massachusetts Amherst

An aerial photograph of a coastal town and bay. The town is situated on a peninsula, surrounded by lush greenery and a sandy beach. The bay is filled with water, and the sky is blue with scattered white clouds. The text "Where are we going???" is overlaid in a white, cursive font across the upper portion of the image.

*Where are we going???*

When we stop to look from a new perspective, we can sometimes see clearer.

Expanding our knowledge of vulnerable periods

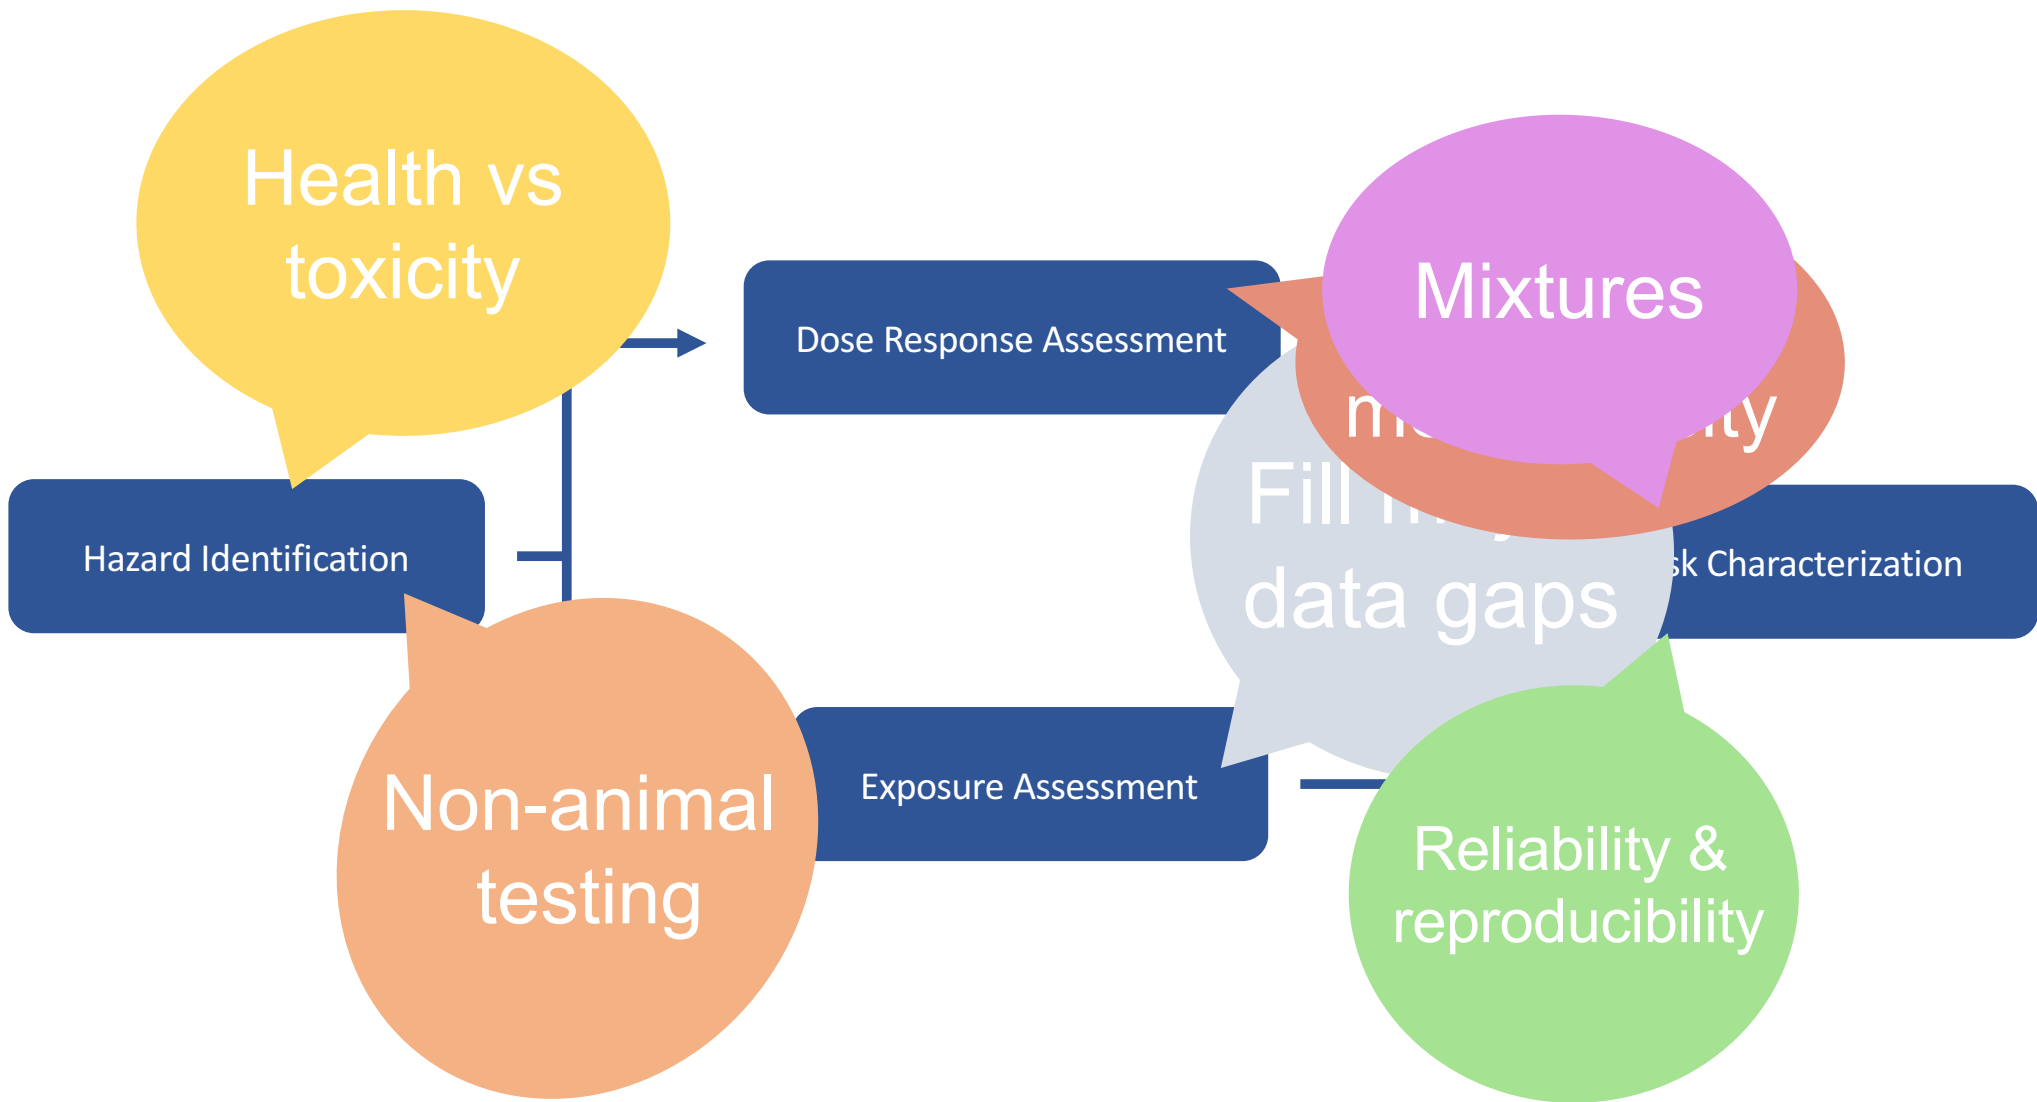

A large pile of mixed nuts and colorful candies, including almonds, cashews, peanuts, and various M&M's candies in red, orange, yellow, green, and black. The items are scattered across the frame, creating a dense and colorful composition. A semi-transparent green banner is overlaid across the middle of the image, containing the text "Improving the evaluation of chemical mixtures".

Improving the evaluation of chemical mixtures

Modernizing the methods used to evaluate risk

Our goal is to avoid regrettable replacements  
& reduce exposures to EDCs
